

Special Education Policy of Herderschule – IB Programme:

As a German public school, Herderschule has to comply with national guidelines concerning the education of children with special needs. Therefore, this document has to be read in connection with "Verordnung über Unterricht, Erziehung und sonderpädagogische Förderung von Schülerinnen und Schülern mit Beeinträchtigungen oder Behinderungen (VOSB)" (Link see below).

Special educational needs (SEN) refers to any student who shows a verifiable need for extra support beyond the general curriculum or to those who are verifiably highly talented and need an extra challenge beyond the general curriculum. To be able to offer students with special educational needs appropriate support, it is essential that parents of IB students share information regarding any special educational needs of their child with the school administration and provide them with appropriate documentation.

Students with special educational needs are encouraged to apply for IB courses and are accepted, provided they meet the prerequisite criteria. The school administration, school management and IB Leadership Team work together with teachers and the IB Organization to ensure that all students enrolled in IB courses have full access to the curriculum and are able to demonstrate their skills and the mastery of the course content.
